

EDUCATION

Rajiv Gandhi Institute of Petroleum Technology (RGIPT)-7.30

2023-2027

B.Tech – Mathematics and Computing · Jais, Uttar Pradesh

City Montessori Inter College-96'Percent' (PCM)

2021-2023

Senior Secondary (Class XII) – PCM · Lkhimpur Kher, Uttar Pradesh

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Typescript, SQL

Backend: Node.js, Express.js, FastAPI, Django, Flask, REST APIs, JWT, Microservices

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite

Databases: MongoDB, PostgreSQL, MySQL

DevOps & Testing: Git, Docker, Linux, Postman, Jest, Pytest, GitHub Actions

ML / Data: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

PROJECTS

Doctor Appointment System [GitHub](#) [Live Demo](#)

2025

Node.js Express MongoDB React.js JWT RBAC REST API Mongoose

Built a **production-grade full-stack MERN application** enabling patients to book, reschedule and cancel doctor appointments with real-time status updates across 3 distinct roles: patient, doctor and admin

Engineered **15+ RESTful API endpoints** using Node.js & Express covering user registration, login and appointment management with structured HTTP responses and API error boundaries

Secured all routes with **JWT-based stateless authentication and granular role-based access control (RBAC)**, enforcing strict permission boundaries across all user types

Designed **optimised MongoDB schemas** with normalised relationships across users, doctors, appointments and transactions — reducing redundant queries and enforcing clean data flow across modules

Deployed on Render with live production URL; configured CORS policies, environment variables and API error handling to maintain **99%+ uptime** in production

Personal Portfolio Website [Live Demo](#) [GitHub](#)

2026

React.js Render Tailwind CSS JavaScript

Built a **fully responsive personal portfolio** using React.js and Tailwind CSS showcasing projects, skills and experience with smooth section-based navigation and a professional modern layout

Implemented **reusable component architecture** with React hooks for dynamic state management, enabling easy content updates and a highly maintainable, scalable codebase structure

Optimised load performance using **Vite bundler** with lazy-loaded assets, achieving fast first-contentful paint and smooth rendering on both desktop and mobile devices

Integrated a **client-side validated contact form** and deployed the site live, providing recruiters and collaborators with a direct and professional point of contact

Air Quality Index (AQI) Prediction [GitHub](#)

Jan 2025

Python Scikit-learn Pandas Matplotlib NumPy

Trained a **Random Forest regression model** to predict AQI from key pollutants — CO, Ozone, NO₂ and PM2.5 — achieving an **R² score of 0.94** on the held-out test set

Built an **end-to-end ML pipeline** covering data cleaning, outlier removal, feature engineering, model training, hyperparameter tuning and evaluation — reducing RMSE by **18%** vs. a baseline linear model

Visualised Actual vs. Predicted AQI trends using Matplotlib and Seaborn; implemented **AQI category mapping** from Good to Hazardous to improve interpretability for non-technical stakeholders

EXPERIENCE & RESPONSIBILITIES

Indo-Russia Hackathon

Ongoing

AI-Powered Loan Sales & Approval System · International

Currently building an **AI-powered loan sales and approval system** under real-world constraints — integrating ML-based credit assessment with a full-stack MERN interface for fast, iterative deployment

Working as **Full Stack Developer**, owning backend REST API architecture and React UI, with ML model integration for

automated loan decision pipelines under competitive sprint conditions

EY Techathon 6.0

2025

Ernst & Young · National Level — Selected for Round 2

Selected for Round 2 at national level — built an AI-powered chatbot for loan assistance that automates customer queries and supports decision-making across the full loan journey
Contributed as **Full Stack Developer**, integrating MERN stack with AI/ML APIs to deliver a production-ready conversational lending assistant under strict hackathon time constraints

Krish AI Hackathon

2025

Government Problem Statement · AI/ML Track

Developed an **AI-powered solution for a real-world government problem statement**, applying machine learning models and REST API integrations to deliver a functional, data-driven prototype
Contributed as **AI/ML Developer**, handling model training, Python pipeline engineering and API connectivity end-to-end within a competitive sprint environment

Design Executive — GDSC RGIPT

2024-Present

Google Developer Student Clubs · Jais, Uttar Pradesh

Led design initiatives for GDSC events, workshops and technical sessions, coordinating with a team of **20+ members** to produce consistent branding, visual assets and community outreach materials
Collaborated with developers and speakers to organise campus events focused on Google technologies, **growing club visibility** and active participation across departments

Open-Source Contributor — GSSoC 2024

2024

GirlScript Summer of Code · Remote

Contributed to open-source repositories during GSSoC 2024, submitting **pull requests for bug fixes**, new feature additions and documentation improvements across multiple active projects
Collaborated with project maintainers and peer contributors globally, following structured code review workflows and shipping improvements to **production-grade open-source codebases**

Executive Member — GeeksForGeeks RGIPT Student Chapter

2023-Present

Organised coding contests, DSA workshops and technical talks to foster a **competitive programming culture**; mentored junior students on problem-solving strategies and technical interview preparation

Volunteer — Arpan, RGIPT Social Council

2023-Present

Participated in community outreach and social impact initiatives, demonstrating **leadership and teamwork** beyond technical domains

ACHIEVEMENTS

- **EY Techathon 6.0** selected for Round 2 at national level — AI-powered loan assistance chatbot built under competitive constraints using MERN stack and AI/ML APIs
- **JEE Mains & Advanced** cleared — among India's most competitive engineering entrance examinations with over 1.2 million candidates annually
- **150+ LeetCode** problems solved with strong coverage of arrays, strings,vector,tree ,and Continous Learning
- **Rated contestant** on CodeChef and Codeforces — regular participation in time-rated competitive programming contests
- **GSSoC 2024** recognised open-source contributor for quality pull requests, timely code reviews and clean submissions

RELEVANT COURSEWORK

Data Structures & Algorithms · DevOps · Object-Oriented Programming · DBMS · Operating Systems · Computer Networks · Machine Learning / AI · Theory of Computation · Probability & Statistics · Finance & Accounting

COMPETITIVE CODING

- **LeetCode** 150+ problems solved — strong DSA foundation in arrays, trees, graphs, DP and recursion
- **CodeChef** Rated contestant — regular participation in time-rated contests · Rating 1215
